# What is VITeff?

## What they think about the last event...

**Philippe Ravillon**  
Managing Director at Ravillon

“ Our attendance was of a high quality and the visitors present had plans in terms of purchasing material. VITeff is an essential date in viticulture. ”

**Maria del Mar Torres**  
Director of the Institut Del Cava

“ VITeff is the reference exhibition for sparkling wines, it is unique in the world and has a highly international orientation. ”

**Frédéric Zisko**  
Director of Operations and Development at Pingat

“ In a few days, we met a significant number of companies with specific projects. It was a first for us, but certainly not the last time! ”

**Richard Planas**  
Former Director of AOC Limoux

“ Champagne is the global benchmark in bubbles and we were very honoured to attend VITeff. ”

VITeff, the Sparkling Wine Technology Exhibition, is **the only international exhibition dedicated to sparkling wine technologies.**

Over 4 days, it brings together all of the key actors in the industry: manufacturers and distributors of materials, service companies, producers of Champagne and sparkling wines from international vineyards, wine experts, technical experts, researchers, institutions, journalists, etc.

**A unique opportunity for exchanges and business** – it's a date not to be missed!
